Manuel de Jesús Cardoza Cardoza

Senior Backend & API Platform Engineer

STACK

Java · Spring Boot · Docker · OAuth2 · Kubernetes · Spring Security · JWT · CI/CD · WebFlux

EDUCATION

2018 - 2022: Systems and Computer Engineering, Universidad Dr. Andrés Bello.

Google Cloud Skill Badges: Develop Serverless Applications on Cloud Run; Deploy Kubernetes Applications on Google Cloud; Develop Serverless Apps with Firebase.

Courses: microservices architecture with Java and GCP; backend development; master's in Java with backend and cloud infrastructure; master's in cloud with AWS, Azure and GCP.

PROFILE

I am Manuel Cardoza, a Systems and Computer Engineer (Universidad Dr. Andrés Bello) and a backend engineer with more than seven years building mission-critical systems for banking, fintech and regulated environments. My foundation is Java (8 to 17) with Spring Boot and Spring Cloud, and API-driven architectures that are secure, scalable and well governed.

PROFESSIONAL EXPERIENCE

JAN 2024 - PRESENT

Microservices and APIs for central banking

Senior Software Engineer · PBS Consulting (project for BCR, the Central Reserve Bank)

I design and build backend microservices with Spring Boot for critical banking operations, with REST APIs secured with OAuth2 and JWT.

AUG 2025 - OCT 2026

Hybrid fiat and crypto financial platform

Tech Lead · Monetae

End-to-end technical leadership of a hybrid (fiat and crypto) financial platform built on hexagonal architecture and Clean Architecture.

MAY 2022 - JAN 2024

Integrating the core banking system with REST and SOAP services

Java Broker Developer · Banco Agrícola

Integration of the core banking system through REST and SOAP services in Java.

2018 - 2022

Systems and Computer Engineering degree

Universidad Dr. Andrés Bello

Degree in Systems and Computer Engineering.

NOV 2020 - FEB 2021

Real-time electoral systems

Learning Facilitator · Supreme Electoral Tribunal of El Salvador

Coordinating technical teams to roll out the electoral systems for the national elections and training the electoral staff.

JUN 2019 - DEC 2019

Secure, event-driven banking applications

Full Stack Developer · Banco Davivienda

Secure banking applications with Java and the Spring ecosystem.

SKILLS

- API design and governance with Apigee: routing, security policies, traffic management and versioning.
- REST, SOAP and GraphQL services with Java and Spring Boot; contract-first with OpenAPI and AsyncAPI.
- Cloud: AWS (ECS, EKS, Lambda, API Gateway, RDS), Azure (AKS, Key Vault, DevOps) and Google Cloud.
- Messaging and events: Kafka, RabbitMQ, JMS and IBM MQ Series.
