Manuel de Jesús Cardoza Cardoza

Senior Backend & API Platform Engineer

STACK

Java · Spring Boot · Docker · OAuth2 · Kubernetes · Angular · Spring Security · JWT · CI/CD

EDUCATION

2018 - 2022: Systems and Computer Engineering, Universidad Dr. Andrés Bello.

Google Cloud Skill Badges: Develop Serverless Applications on Cloud Run; Deploy Kubernetes Applications on Google Cloud; Develop Serverless Apps with Firebase.

Courses: microservices architecture with Java and GCP; backend development; master's in Java with backend and cloud infrastructure; master's in cloud with AWS, Azure and GCP.

PROFILE

Backend engineer with more than seven years on mission-critical systems for banking, fintech and regulated environments.

PROFESSIONAL EXPERIENCE

Client infrastructure omitted for confidentiality.

JAN 2024 - PRESENT
Microservices and APIs for central banking
Senior Software Engineer · PBS Consulting (project for BCR)

Secure microservices and APIs for critical banking operations.

AUG 2025 - OCT 2026
Hybrid fiat and crypto financial platform
Tech Lead · Monetae

Technical leadership of a fiat and crypto financial platform.

MAY 2022 - JAN 2024
Core banking integration with REST and SOAP services
Java Broker Developer · Banco Agrícola

Core banking integration in Java through REST and SOAP.

2018 - 2022
Systems and Computer Engineering degree
Universidad Dr. Andrés Bello

Degree in Systems and Computer Engineering.

NOV 2020 - FEB 2021
Real-time electoral systems
Learning Facilitator · Supreme Electoral Tribunal of El Salvador

Technical coordination of the national elections' systems.

JUN 2019 - DEC 2019
Secure, event-driven banking applications
Full Stack Developer · Banco Davivienda

Secure banking applications with Java and the Spring ecosystem.

FEATURED PROJECT

2026 - PRESENT
SaaS portfolio platform with an AI assistant
Design, development and operations · Personal project · open source

Full-stack platform with a contract-first API, hexagonal architecture and an AI assistant that cites the source code.

SKILLS

- API design and governance with Apigee: routing, security policies, traffic management and versioning.
- REST, SOAP and GraphQL services with Java and Spring Boot; contract-first with OpenAPI and AsyncAPI.
- Cloud: AWS (ECS, EKS, Lambda, API Gateway, RDS), Azure (AKS, Key Vault, DevOps) and Google Cloud.
- Messaging and events: Kafka, RabbitMQ, JMS and IBM MQ Series.
